Projects

Kalindee-Mart — Full Stack E-commerce Website *React.js — PHP — Laravel — MySQL — REST API*

- Developed a responsive e-commerce application with user registration, login and Laravel API-based authentication.
- Implemented product listing, product details, category-wise products, search, sorting, ratings, reviews and discount/price display.
- Built shopping cart functionality including quantity management, remove from cart, wishlist and moving wishlist products to cart.
- Developed checkout flow with customer details, address management, payment-method selection, order confirmation, order history and order status.
- Integrated Laravel REST APIs with MySQL for authentication, products and orders with validation and error handling.
- Used reusable React components and Git/GitHub for modular development and version control.

Kalindi Food Delivery — Frontend Web Page *HTML5 — CSS3 — JavaScript — Responsive Design*

- Developed a responsive food-delivery webpage compatible with mobile, tablet and desktop screen sizes.
- Created structured layouts and interactive frontend elements using HTML, CSS and JavaScript.
- Focused on clean UI design, responsive layouts and user-friendly frontend experience.
